DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 8-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. Claim 8 recites the limitation "the pre-determined capabilities" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 8-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Grigor et al. U.S.

Patent Number: 6,618,026 B1 (hereinafter "*Grigor*".)

5. Referring to claim 8, *Grigor* teaches a process for the automatic adaptation of the data to be transferred from a data-preparing device [see figure 1, element 18, 20, 22] to a data-requesting device [see figure 1, element 24 or 26 or 28 or 30] to the capabilities of the data-requesting

Art Unit: 2181

device [see column 2, lines 24-48], in which the data-preparing device receives information data about the capabilities of the data-requesting device [see figure 2, set of modes for display 24, 26, 28 and column 4, lines 11-15], and the information data contain statements in regard to the display format usable by the display of the data-requesting device [see column 3, lines 29-64, 'display modes'], and the data to be transferred are transmitted in correspondence to the pre-determined capabilities of the data-requesting device, wherein a list of usable display formats is transmitted to the data-preparing device, and the data-preparing device, then, according to availability, selects the best-suited display format [see column 3, lines 29-64, altering one or more parameter of the drawing surface settings to generate an alternate drawing surface setting to provide a better match for the display mode of the device.]

6. **Referring to claim 9**, *Grigor* teaches wherein the information data are transmitted from the data-requesting device to the data-preparing device [see column 2, lines 24-48 and column 3, lines 29-64.]

7. **Referring to claim 10**, *Grigor* teaches wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device [see column 2, lines 24-48 and column 3, lines 29-64.]

8. **Referring to claim 11**, *Grigor* teaches wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the pre-determined data format and transmitted to the data-requesting device [see column 2, lines 24-48 and column 3, lines 29-64, memory 34.]

9. **Referring to claim 12**, *Grigor* teaches wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device [see figure 1, elements 18.]

10. **Referring to claim 13**, *Grigor* teaches wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device [see column 2, lines 24-48 and column 3, lines 29-64, memory 34.]

11. **Referring to claim 14**, *Grigor* teaches wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device [see column 2, lines 24-48 and column 3, lines 29-64, memory 34.]

Response to Arguments

12. Applicant's arguments with respect to claims 8-14 have been considered but are moot in view of the new ground(s) of rejection.
